

Earth Day Clean Up Moores Lane

Trustee Peter Clark creates 3 groups, 2 Village Workers Assist

April 17, 2021

Rotary volunteers just pulled this out of the water along Moores Lane's west path

Building #10 volunteers headed into what becomes an open field north of the reservoir.
The concrete base keeps the weeds down.
The neglect encourages dumping.

Volunteers excited to find a WWI howitzer holding up a fallen tree in the field north of west side reservoir. It used to grace the front of the Legion Hall.

View of bridge to Building #10 from open field where telephone poles are stored

Magical and hidden view of reservoir.

View west from Bldg. 10 bridge of Moores Drain

View of Bldg. #10 from bridge, storage for Village & hides view of Hawkeye Private Power Plant [not the site of a mystery as its name implies].

We can only love what we know,
we will only preserve what we love.

What highest & best use of this sunny area?

WWI
Howitzer

Hawkeye
Peaker
Power Plant
